# ABOUT US

## What do we do

Eleven0nine82 Energy Solutions provides hospitals, practitioners and wholesalers with the finest quality healthcare products. We manufacture, source and supply a wide range of products in the Surgical, Pharmaceutical, Pre-Packing and Cardiology sectors.

## Mission

Eleven0nine82 Energy Solutions strives towards enabling individuals to live happier and healthier lives. We aim to do this by providing the medical community with high quality, innovative and well-priced medical and surgical products.

## Vision

To distinguish ourselves as leaders in providing quality healthcare products and to improve the effectiveness and efficiency of today's challenging medical and surgical practises.

## Our Principles

- To attain excellent standards and become a competitive benchmark within medical industry practises and beyond.
- To create strong, cooperative relationships with all of our stakeholders.
- Maintain integrity, honesty and the highest ethical standards.
- Constantly invest in innovation and creativity and solve complex problems in a contemporary industry.
- Deliver quality service to our customers.
- Strive to improve every aspect of our business day-in and day-out.

## Our story

Eleven0nine82 Energy Solutions is a South African company. The company has expanded from its roots of primarily manufacturing hospital consumables to a nationwide manufacturer, sourcer and supplier of various health care products.

## Our approach

Our approach can be summed up in one simple word - SYNERGY. LMS is truly passionate about teamwork. Our goal is to create quality products that truly touches the heart, and we believe that by designing a team that operates as one, we can achieve this goal.

## Our team

LMS currently employs over 90 people. The quality of our employees is the linchpin to satisfied customers. We therefore ensure that a tremendous amount of resources are invested in the selection, development, training and evaluation of our employees.

## ABDOMINAL GAUZE SWAB

### Description:

Our TaraTex abdominal gauze swab is a highly absorbent gauze swab used for absorbing fluids in deep wound cuts or cavity wounds and preparing these wounds for dressing.

### Features:

- Made from 100% cotton
- Combination of softness and abrasive texture
- Blue pull-out tag for easy withdrawal of swabs and for the indication of how many swabs are still left in the body
- X-Ray detectable
- Available in a number of sizes
- Available in sterile or non-sterile

### Benefits:

- Easy to apply
- Maximum absorbency of fluids
- Enhanced healing

### Indications:

- To be used for primary care of medium to heavy secreting wounds.

### X-RAY DETECTABLE NON-STERILE

## GAUZE SWABS

### Description:

Our TaraTex gauze swab is a highly absorbent gauze swab used for absorbing fluids from wounds on the surface of the body.

### Features:

- Made from 100% cotton
- Combination of softness and abrasive texture
- Available in a number of sizes
- Available in sterile or non-sterile form
- Available in X-Ray

### Benefits:

- Easy to apply
- Maximum absorbency of fluids
- Enhanced healing

### Indications:

- To be used for primary care of light to moderately secreting wounds.

## PARAFFIN GAUZE DRESSING

**Description:** Our Taranet Paraffin Gauze Dressing is a non-adherent wound dressing which is atraumatic in nature and acts as a primary dressing layer that prevents any damage of skin tissue when removing appropriate secondary dressings. Made of polyester mesh and impregnated in a soft, non-adherent matrix containing; petroleum jelly, super-absorbent powder, medical grade soft paraffin and cohesive polymers.

### Benefits:

- No damage to skin when removing secondary dressings
- Soothes and protects the wound

ITEM CODE	SIZE	PIECES/BOX	BOXES/CASE
DRE015	100X100MM	10	60
PAR007	100X400MM	10	60
DRE036	100MMX7M (ROLL)	1	18

# TARANET PLUS

## PARAFFIN GAUZE DRESSING WITH CHLORHEXIDINE

**Description:** Our Taranet Plus Paraffin Gauze is a non-adherent wound dressing which is atraumatic in nature and acts in the same way as our standard Taranet Gauze Dressings, but what differs Taranet Plus is that it is coated with chlorhexidine gluconate which acts as a disinfectant and antiseptic and prepares the wound for primary dressing.

**Benefits:**

- Chlorhexidine Gluconate kills a wide range of dangerous micro-organisms including Gram-negative Bacteria such as Escherichia coli and Pseudomonas aeruginosa; Gram-positive Bacteria such as Staphylococcus aureus, MRSA and VRE; and fungi such as Aspergillus niger and Penicillium nigricans.
- Contains 0.5g chlorhexidine acetate per 100g mass of soft paraffin
- No damage to skin when when removing secondary dressing
- Soothes and protects the wound

ITEM CODE	SIZE	PIECES/BOX	BOXES/CASE
PAR013	100X100MM	10	60
PAR012	100X400MM	10	60

# Viscopore

## POST-OP WOUND DRESSING

**Description:** Our Viscopore is a laminated, non-woven dressing containing a breathable PU layer with a central, absorbent, non-adherent pad.

### Features:

- The unique structure of the Viscopore non-woven dressing, with PU layers, gives it strength and extreme flexibility
- The distinctive molecular structure contained in the PU layers allow the product to be permeable to water vapour
- Bacteria proof. Chances of infection is highly reduced
- Highly absorbent and conformable pad. Laminated with PE net at one side to prevent adherence with the wound
- Stripe coated, hypoallergenic, latex-free adhesive
- Individually packed in peel-able pouch and sterilized by E.O gas

### Benefits:

**Highly absorbent and low-adherent pad:** The PE wound contact layer enables the passage of blood and exudates to the highly absorbent pad, whilst maintaining a good healing environment and minimal pain during dressing removal.

**Safe and Secure Fixation:** Striped coated hypoallergenic adhesive allows wounds to breathe. No adhesive traces remain on skin after removal. Provides a safe and secure dressing fixation over the wound site.

**Soft and Conformable:** Ensures the patient comfort and conformability to the wound site.

**Patient Comfort:** Viscopore's structure gives a comfortable effect through its soft cushioning. The pad construction minimises fluid strike-through and protects the wound from trauma upon removal. Skin colour PU in the outermost layer increases patients' compliance.

### Application:

Viscopore non-woven adhesive dressing is best suited for post-operative use. However, it can be used for accident and emergency situations - in case of cuts, lacerations and sutured wounds.

## TRANSPARENT IV DRESSING

**Decription:** Our EEZIDERM Intravenous dressing is a transparent adhesive catheter fixation dressing.

### Features/Benefits:

- Outstanding cathether stability
- Transparent and breathable
- Easy and simple to use
- Dressing offers user safety, great comfort and painless removal
- Specially designed materials used in the dressing do not irritate the skin
- Air and humidity pass freely through the dressing
- NO traces of adhesive remain on the skin after removal
- Less dressing changes needed
- Risk of infection reduced by preventing moisture accumulation
- Visual inspection is convenient
- High moisture vapour transmission rate film

### Application:

- Dialysis catheters
- Pulmonary Artery and Arterial Catheters
- Paediatric and Adult Venous Catheters
- Short Peripheral and Midline Venous Catheters
- Central Venous Catheters
- External Feeding Tubes

# CLAROSITE

Premium Protection

## TRANSPARENT ISLAND DRESSING

**Description:** Our CLAROSITE transparent island wound dressing treats light to moderately secreting wounds. Polyurethane bacteria proof and water proof film coated with a hypoallergenic adhesive and a central non-adherent wound pad.

### Features

- Polyurethane film allows wounds to breathe and protecting the skin against
- Highly absorbent, non-adherent wound pad
- Coated with hypoallergenic adhesive
- Sterilized with ethylene oxide gas
- Latex free formula

### Benefits:

- Easy to apply
- Undisturbed state of wound is maintained
- Enhanced healing and reduced pain due to moist wound environment
- Bacteria-proofing reduces chance of infection
- Water-proofing allows patient to shower with dressing applied
- Dressing can be left on for 5 days - minimising interference at wound site

### Indications:

- Best suited for post-operative use
- To be used for primary and secondary care of light to moderately secreting wounds

# ABSOCLEAR

## IV DRESSING WITH CHLORHEXIDINE

**Description:** Absoclear is used to secure catheters, hoses and pipes. Absoclear has an island pad impregnated with chlorhexidine on a PU film coated with hypoallergenic adhesive.

### Features/Benefits:

- Water-proofing allows patient to shower with dressing applied
- Breathable
- Keeps catheters firmly in place
- Adheres to skin and can be applied without the need of fixation tape or secondary film dressing
- Integrated chlorhexidine allows for anti-microbial protection and reduced risk of infection
- Pain free removal
- Easy to apply

**Application:** Cannula and catheter fixation

# OPTI-SIL

## SILICONE FOAM DRESSING WITH SILVER

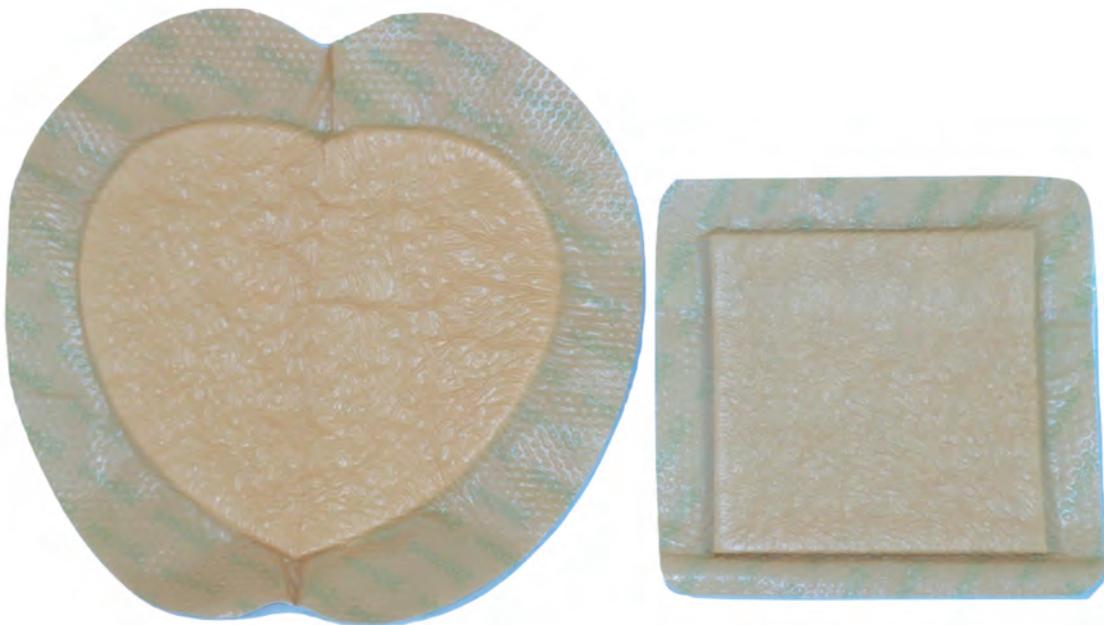

**Description:** Our OPTI-SIL dressing is a soft bordered foam dressing with silicone that adheres gently to the surrounding skin of the wound with or without silver.

### Features/Benefits:

- Highly absorbent dressing
- Easy to apply and helps reduce the risk of maceration
- Pain free dressing removal
- Waterproof and breathable backing
- Wound remains moist - optimal MVTR (Moisture Vapour Transmission Rate)
- High fluid handling capacity

### Application:

- Venous and Arterial leg ulcers
- Diabetic foot ulcers
- First/Second degree burns
- Stage I - IV pressure ulcers
- Traumatic Wounds

# CARB-FIX

## ACTIVATED CARBON DRESSING

**Description:** Our Carb-Fix dressing is a thin dressing containing an activated charcoal layer which is the ideal solution for malodorous wounds. The wound contact layer is also laminated with a polyethylene net containing silver compound which provides anti-microbial protection.

### Features/Benefits:

- Absorbs and contains odours
- Silver compound kills microorganisms, stops their growth and prevents infection
- Easy to apply
- Breathable backing which allows for application of a secondary dressing

### Application:

- First & second-degree burns
- Donor sites
- Surgical wounds
- Venous, pressure and diabetic ulcers

# Eezi-Film

## SURGICAL INCISION PROTECTIVE FILM

**Description:** Eezi-Film is a transparent, breathable ultra-thin film spread that prevents cross infection by protecting parts of the body other than those to be examined/incisioned.

**Features/Benefits:**

- Minimal tissue injury when removed (atraumatic)
- Waterproof
- Breathable
- Easy to apply
- Provides a sterile environment during operation
- Prevents cross infection during operation

**Application:**

- Small to large incisions

# DUROPLAST™

## POP BANDAGE (LENO)

**Description:** “Duroplast” Plaster of Paris Bandage is made from specially woven Leno Gauze evenly impregnated with the best quality Plaster of Paris Powder (gypsum) that produces an even cast and excellent finish. The bandage hardens after being exposed to water.

### LENO-WEAVE TECHNOLOGY:

Leno weave is a weave in which two warp yarns are twisted around the weft to provide a strong yet sheer fabric. Our factory's state of the art machinery provides the ideal solution for producing high quality open mesh (leno weave) fabric. The interlocking Leno-Weave aids in powder retention whilst soaking and molding. It also helps the bandage achieve superior tensile strength.

### Features/Benefits:

- The bandage only needs to soak in water for approximately 5 to 10 seconds before hardening
- Solidification occurs in 3 to 5 minutes.
- The caloric value produced during the solidification process causes no harm and is completely biocompatible with the human body.
- The bandage dries with ease after solidification
- Highly porous coating
- High load bearing capacity: Achieved due to high tensile strength of Leno Gauze and high concentration of Plaster of Paris Powder

**Application:** Used to encase broken or injured bones in limbs, arms or larger parts of the body so as to stabilize anatomical structures and heal the injured part of the body.

# DUROCAST™

## SYNTHETIC CASTING BANDAGE

**Description:** Durocast Synthetic Casting Bandage is made of flexible Fiberglass/Polyester tape impregnated with water activated Polyurethane resin

### Features/Benefits:

- Lightweight & Strong Cast
- Short Application Time
- Excellent Conformability
- Good X-Ray Translucency
- Air Permeable
- Smooth Finish
- Softer Edges

**Application:** It is used for making light weight casts for immobilization after fractures & other orthopaedic corrections

## 100% SILICONE FOLEY BALLOON CATHETER (STERILE)

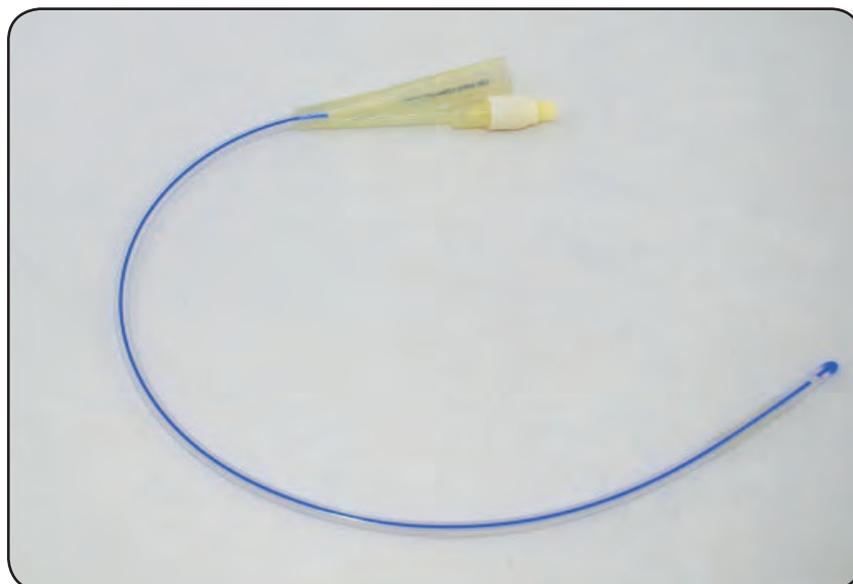

**Description:** A flexible tube designed to drain urine from the bladder. By inflating the balloon using a syringe containing sterile water, the catheter is unable to slip out of the bladder. Suitable for long term patients placed in intensive care units.

**100% Silicone:** Silicone is a man-made biocompatible material and non-adherent and non-reactive to human tissue. It contains no extractable chemicals and therefore bacteria cannot grow on its surface.

### Features/Benefits:

- 100% Silicone Material - Inert material preferred for medical devices.
- Less urethral irritation and stricture versus latex material.
- Less encrustation compared to latex catheters.
- 100% Latex-Free.
- Smooth edges aid in the catheterization process
- Minimum leakage and maximum drainage
- Colour coded valves
- Non-adhering and non-reactive material

## SILICONE COATED FOLEY BALLOON CATHETER (STERILE)

**Description:** A flexible tube designed to drain urine from the bladder. By inflating the balloon using a syringe containing sterile water, the catheter is unable to slip out of the bladder. Suitable for short-term patients. Silicone provides smooth surface for easy insertion and removal of catheter.

### Features/Benefits:

- Smooth edges aid in the catheterization process
- Minimum leakage and maximum drainage
- Colour coded valves
- Non-adhering and non-reactive coated material

## STERILE NELATON CATHETER

**Description:** Used for short-term bladder catheterisation **(MALE)**

### Features/Benefits:

- Colour-coded funnel insert of catheter ensures quick and easy identification of size
- Individually packed in sterile packaging
- Medical grade and non-toxic tubing
- Transparent PVC provides urine visibility
- Consistent flow rates
- Smooth inner surfaces reduces foaming and facilitates removal of air
- Sterile and disposable

## STERILE NASAL FEEDING TUBE

**Description:** Flexible feeding tube used to provide nutrition to patients who are unable to receive nutrition by mouth, are unable to swallow safely, or need nutritional supplementation.

### Features/Benefits:

- Soft edges prevent patient irritation and discomfort
- Colour coded valves
- Effectively delivers nutrition to patient
